Logo

Rationale

The “M” elements which form the logo stand for “Marketplace”, intertwined to reflect collaboration, co-creation and matching providers and users, forming on the one side a winning star, and on the other side the visual effect of looking from the ground up into the inside of a cupola as an architectural element similar to the hollow upper of sphere.

Curved-roof structures (domes) can come from a classical or modern heritage, in both cases the symbolism associated with ‘domes’ are about constructing something of high importance, sustainable, visible and giving room to bring individuals and groups together.

The “M”s themselves additionally reflect – with their ‘arrows’ indication – the cloud-to-edge concept (and vice-versa) thanks to the three major actors involved: Marketplace providers, Cloud service providers, Service consumers.

TYPOGRAPHY

Primary Typeface

The name of the typeface used for the logotype is [Blinker](#). Blinker is a low contrast sans serif typeface with a squircle as its basic shape, think squarish curves, or Eurostyle's flamboyant cousin. Blinker is a font family carefully crafted & designed for computer screens. One of the peculiarity of this font is that it is Open Source, so not just free but "open to get contributed".

TYPOGRAPHY

Secondary Typeface

Arial is the secondary typeface (system font).

It should only be used for communications when we can't use our primary typeface.

VISUAL

Mockup

A background including a designed motif can be used in print or digital campaigns to enhance the DOME project brand recognition.

Image style

IMAGE STYLE

Approach and Style

Usage

Images should be used to support and illustrate a story.
People are used in context and real life scenarios.

Style

- Natural lighting without any extensive postproduction, stage setting or dramatic colors
- Should the image involve people, it should feature them acting naturally, not posed.
- The use of depth of field when capturing people or products in relation to their surroundings can also help to add visual interest to the image.

IMAGE STYLE

Special usage

Pictures can be given an image personality. Different colors can create different tones and moods in the imagery as well. Warm colors and its different shades can help to create images that feel welcoming, vibrant and exciting to target customers.

There are cool colors that can be seen as refreshing or replenishing, sometimes very relaxing.

To create additional image personality, Blue Primary and Light Blue can be used.
